

## Unit 1 > Text 3 > A tough teacher

### Corrigé

1. **Most** adults think that we pamper children **too much**. Today, **many** parents think that discipline is not strict **enough** but **many** teenagers complain that their parents spend **little** time with them. **A few** parents think that there is **too much** discipline in schools but **few** parents would send the teacher to prison for what he did. Only **a few** adults think that a teacher should be severely sanctioned for this. There is **too little** understanding between adults and teenagers and we should encourage **much** more communication between them.

2. a. I am **in favour of** punishing students when they disobey but I would **oppose** the reintroduction of corporal punishment in my school. Most parents and students would **object to** this.

b. **Rather than** hit children, we should try to make them understand the rules.

c. **Instead of** allowing children to do what they like, we **need to encourage** dialogue.
